

COBIT205: COBIT® 5 Foundation and Implementation IT Governance Training

COBIT® 5 builds and expands on COBIT® 4.1 by integrating other major frameworks, standards and resources, including ISACA's Val IT and Risk IT, Information Technology Infrastructure Library (ITIL®) and related standards from the International Organization for Standardization (ISO). COBIT® 5 helps enterprises of all sizes:

- » Maintain high-quality information to support business decisions
- » Achieve strategic goals and realize business benefits through the effective and innovative use of IT
- » Achieve operational excellence through reliable, efficient application of technology
- » Maintain IT-related risk at an acceptable level
- » Optimize the cost of IT services and technology
- » Support compliance with relevant laws, regulations, contractual agreements and policies

COBIT® is internationally recognized as the “go to” solution for the IT Governance and Control Framework, with aspects in security, quality and compliance. At Interface Technical Training, students gain the advantage of learning from Mark Thomas who has earned certification from ISACA®, which developed the COBIT® framework. Mark is one of a very select few COBIT®-certified trainers in the U.S. and brings real-world experience of deploying COBIT® in live situations. COBIT® is a trademark of ISACA® registered in the United States and other countries.
